**Product Launch of New Drop Tester “ DT-80M series “**

SHINYEI TESTING MACHINERY CO.,LTD. is proud to present our new drop tester for packages, DT-80M Series as shown in Fig.1.

DT-80M has been designed by SHINYEI TESTING MACHINERY in Japan which has accumulated mechanical designing technologies based on its long history of development and manufacturing of drop/shock testing machines and systems since 1964.

All the technical distinctions of the DTS series, our high accuracy models of drop testers for packages, have been utilized to the DT-80M, and some functions have been refined and simplified, resulting in very simple design that becomes our new standard model for conducting the drop tests for packages in the worldwide market.

This series will be manufactured and distributed by SHINYEI KAISHA ELECTRONICS (M) which is an affiliated company of SHINYEI group located in Malaysia. This testers made in Malaysia can be used with long term reliability, high durability as well as quality assurance based on Japanese standards, since it has same quality control practices as we do in Japan. Moreover, through this collaboration between Japan and Malaysia, our production flexibility, engineering services, calibration and maintenance services can be provided more effectively and swiftly for our customers all over the world. We are working even harder for contribution to the realization of useful and safe testing circumstances for all customers.

**<Product information>**

Product Name	: Drop Tester for Packages
Model	: DT-80M
Specimen max weight	: 80kg
Specimen max size	: W900 × D575 × H900 mm
Drop height range	: 200-1800 mm
Machine size	: W920 × D1480 × H2583 mm
Machine weight	: 320 kg
Power supply	: 200VAC, 3 phases 5A
